

This is a sample class schedule for a student to take one year of dual credit classes in high school and then one year at Sandburg before entering the Associate Degree Nursing (RN) program. By following this plan, students could graduate from Sandburg with both an Associate Degree Nursing and an Associate in Art degree that would prepare them to transfer to a BSN program.

Students must apply for admission into the ADN program and meet admission requirements. This schedule is subject to change.

SENIOR YEAR IN HIGH SCHOOL
